Bachelor of Electrical Engineering in Computer Science

Oct 2020 - Jul 2025

zagazig university

GPA: very good

PROJECTS

Graduation Project– AINO <https://github.com/ayman-ezzeldin/AiGen> || [Demo:https://ai-gen-jmaz.vercel.app/](https://ai-gen-jmaz.vercel.app/)

Built Blog module with search, filtering, and detailed post views using React & React Router. Developed Community & Group pages with full CRUD operations for topics and posts. Integrated RESTful APIs for blogs, comments, and community interactions. Designed responsive UI with Tailwind CSS, ensuring cross-device compatibility. Delivered scalable, reusable components for maintainable front-end architecture.

Technologies: React, JavaScript, tailwind, HTML, CSS, MongoDB

Education-Website

<https://github.com/Abdelrhman-Reda-02/Education-Website>

Multi-page structure ,Responsive layout using pure CSS Contact form with basic JavaScript validation Simple interactivity with DOM manipulation (show/hide, dynamic elements) Organized project structure

Technologies: HTML, CSS, JS, Slider.js

Softy pinko

<https://github.com/Abdelrhman-Reda-02/Softy-Pinko>

Softy Pinko is first project for me to convert design to responsive landing page and it was Full of challenges The website was designed using a template from Templatemio. The template has been customized and optimized to create a responsive and visually appealing landing page that adapts seamlessly to various devices and screen sizes.

SKILLS

Technical Skills: HTML, CSS, JavaScript, Tailwind CSS, GitHub, ReactJS
